

The undersigned stationdoctor at Grytviken whaling station was the 3rd March 1911 brought to the whaling factory Thor 1 to examine the worker Martin Knudsen, that after Captain Bryde`s opinion suffered from appendicitis which also proved to be the case. He treated accordance with the applicable rules. As the condition worsens, he was asked if he wanted operation as a last means to made. Then there was the case 8 ds laparotomi made with the assistance Dr. Cruickshank and Dr. Mathisen. It appeared then that appendix inflammation affected his to diffuse peritonit - peritonitis. The case proved so to be hopeless and death occurred this morning at 6
